

A world map celebrating the voyage of Willem Schouten

DE BRY, Johann Theodore.
 [Guilhelmi Schouten in australem oceanum expeditio.]

Oppenheim: de Bry, c.1619. Engraved map 170 x 210mm, set in letterpress.

£650

A double-hemisphere world map used as a frontispiece to De Bry's 'Pars Undecima Americæ' (Grand Voyages Part XI), which contained the account of the voyage of Willem Shouten (c.1567-1625) in which he was the first to round Cape Horn (1616). The map marks his route but has little other detail. The borders, on the other hand, are finely-engraved, with large portraits of Schouten and Magellan and medallion portraits of Francis Drake, Olivier van Noordt, Thomas Cavendish and Joris van Spilbergen.

SHIRLEY: 301.
