

Scarce 17th century map of the Palatinate of Poznan

JANSSON, Jan.

Palatinatus Posnaniensis, in Maiori Polonia Primarii Nova Delinatio per G.F.M.

Amsterdam, c.1660, blank verso. 460 x 540mm.

£480

A scarce map of western Poland, centred on Posnan, with fine cartouches for the title and scale and an armorial. The cartographer was Georg Freudenhammer, a local physician (the 'm' of the attribution stands for 'medicus'). As it was a late addition to the Jansson opus it is comparatively scarce.
