

A bird's-eye view-map of Malta

CALMET, Augustin Antoine.

Ancien Plan De L'Isle de Malte, où S. Paul Aborda après son Naufrage. Act. XXVIII. 1.

Paris, c.1722. Coloured. 330 x 460mm.

£480

A map of Malta shown as if from an elevated viewpoint, orientated with north to the bottom right, with a 33-point key.. Although the map was published in Calmet's 'Dictionnaire historique' and has a title referring to the shipwreck of St Paul on the island, the mapping is mostly contemporary, with Valletta's geometric defences.
