

The Solar Systems according to Ptolemy, Brahe and Riccioli

THOMAS, Corbinianus.

Systema Ptolemaicum. Systema Tychonis. Systema Riccioli.

Frankfurt, 1730. Original colour. 125 x 135mm.

£180

An 18th century chart of the Solar Systems according to Cladius Ptolemy, Tycho Brahe and Giovanni Battista Riccioli, engraved by Johann Christoph Berndt for the celestial atlas 'Mercurii Philosphi Firmamentum Firmianum', named for Thomas's patron, Leopold Anton von Firmian, Archbishop of Salzburg. Corbinianus Thomas (1694-1767), a Benedictine monk, was Professor of Mathematics and Theology at the University of Salzburg. His star atlas was first published in 1730 at Frankfurt, with a second edition at Augsburg the following year. He used an odd system for nomenclature: Bayer Greek letter for the star, Roman numeral for the magnitude and Arabic numeral for the star catalogue reference.

KANAS: 7.7, 'beautiful illustrations'; WARNER, p.251.
