

An 18th century double-hemisphere world map

SEUTTER, Matthäus.

Diversi Globi Terr-Aquei Statione Variante et Visu Intercedente per Coluros Tropicorum..

Augsburg: Tobias Conrad Lotter, c.1760. Coloured. 205 x 260mm.

£900

Seutter's smaller double-hemisphere world map, with celestial spheres in the cusps. California appears as an island; Ezo is a large adjunct to Japan, with 'Campangie Land' just to the north; and Australia and New Zealand are partial outlines. This example was published by Lotter, his son-in-law and successor.
